Why should I recycle? Does it really make a difference?

Yes! For every ton of material recycled, the City of Mesa receives revenue which goes into the City's general fund. This helps to support many of the services provided by the City of Mesa such as parks, libraries, street maintenance and emergency response services. On the flip side, the City of Mesa pays a disposal fee for every ton of material that is buried in the landfill.

My plastic bags say they are recyclable. Why can't I place them in the recycle bin?

Plastic bags and plastic wrap get tangled in the machines used to sort recyclables which slows down the sorting process and damages the equipment. Instead you should recycle them at your local retailer so they can bypass the sorting system.

Why can't I bag my recyclables in plastic or paper bags?

Recyclables should be dry, relatively clean, loose and not bagged when placed in the recycle bin. Collected material is sorted at a rate of up to 25 tons per hour

and unfortunately staff cannot open or empty bags due to the risk of possibly contaminating loose recyclables with unknown or non-accepted material such as food, animal waste, diapers or yard trimmings. Bagged material will be pulled from the sorting line and sent to the landfill.

What if I place non-acceptable items in the recycle bin?

Placing non-acceptable items such as Styrofoam, plastic bags, clothing, yard waste or any other items listed on the back of this flyer in the recycle bin can jeopardize Mesa's recycling efforts. Under the City of Mesa's recycling contract, the vendor reserves the right to refuse contaminated loads or impose substantial penalty fees so please remember to only recycle the items listed above. If you have a question about a specific item, feel free to send an email to waste.info@mesaaz.gov.

Recycle Right. It Matters.

NO! Do not recycle these items in the recycle bin.

Non-Accepted items

Unfortunately, some things are not recyclable due to their specific composition or form OR cannot be recycled in Mesa's recycle bin due to the limitations of the sorting process at the materials recovery facility. And while intentions might be good, placing non-acceptable items in the recycle bin causes more harm than good. Non-acceptable items lower the value of accepted materials as well as can damage the sorting equipment.
